

WHAT IS CLAIMED IS:

5

Suk G 1. ~~An electronic apparatus detachably connected to an input device, comprising:~~
a main unit;
a display unit rotatably attached to the
10 main unit; and
a retaining mechanism retaining the input
device ~~between the display unit and the main unit.~~

15

20

Suk B1 2. The electronic apparatus as claimed in claim 1, wherein the retaining mechanism comprises at least one supporting member.

25

Suk G2 3. The electronic apparatus as claimed in claim 2, wherein the supporting member is mounted so as to be storable in the main unit when the input device is not being stored.

30

35

Suk B1 4. The electronic apparatus as claimed in claim 1, wherein the retaining mechanism comprises an engaging member engaging the main unit and the input device.

Stk 3 5. ~~The electronic apparatus as claimed in claim 4, wherein the engaging member is mounted so as to be storable in the main unit when the input device is not being stored.~~

10 *Stk BII* 6. The electronic apparatus as claimed in claim 1, further comprising:
at least one detector detecting each of a storage and a removal operation of the input device;
15 and
control means controlling a predetermined operation of the electronic apparatus according to a signal of the detector.

20 *Stk 4* 7. An input device detachably connected to an electronic apparatus, the electronic apparatus comprising a main unit and a display unit rotatably attached to the main unit, the input device comprising:
at least one engaging member engaging the main unit so that the input device is retained
30 ~~between the display unit and the main unit.~~
